<b>Goals</b>	We want to learn about agile methods, good team work and practice team work. We want to build a cool open-source piece of software and “valuable” NFTs.
<b>Meeting norms</b>	We meet at least once a week during the project.
	Please excuse yourself when you know that you’ll be missing (like illness, important appointment) otherwise we want to not more than 15min late but on time in the average case. Single lapses or emergencies are permissible.
	We try to reach consensus where possible. As last resort we respect the majority rule for decisions which affect the whole team. Exceptional decisions for individual team members are possible for special circumstances.
<b>Working norms</b>	We participate fairly. It doesn’t mean that everyone is equally fast or performing but that we are willing to invest time like others are.
	We individually contribute to the project to perform for our Credit Points.
	Work is distributed in team meetings together.
	Team work should be a safe space for everyone and allow for clarifying work or personal conflicts or appropriate criticism.
	You may contact Jule as person of trust for non-technical problems and as mediator for anonymous criticism.
	We value quality over quantity, maintainability over many features.
<b>Coordination norms</b>	No one is forced to do something s/he really doesn't want. Volunteers are considered first. If no one is willing to do a task and assignment is needed then democratic allocation.
	We let others say their (valid) opinion and avoid insults, harassment, discrimination due to individual properties like gender, color...
	We don’t expect each other to respond during weekends. We expect responses in 48h within week. We try to answer at least next day.
<b>Communication norms</b>	We use team Channels on Slack for help.
	We confess that nobody is perfect. We accept criticism of ourselves and permit others to correct us.
<b>Consideration norms</b>	We try to clear misunderstanding and create understanding instead of bashing others for disagreement.
	We don’t want to be self-opinionated and give examples rather than just stating to be right.
<b>Cont. improvement norms</b>	There is continuous review of code and our wellbeing by using the “happyness index”. We will use Scrum-related methods to track progress. Coding, Style and review rules and guidelines are respected for the reason of code health and team work. Syntax Formatters will be used if they are needed to ensure style guidelines.
	If someone can’t finish story points over two weeks then we try to find a solution for improvement.
	Workload estimation isn’t perfect. We will tell if work turns out to be more effort than estimated.
<b>Rewards</b>	People will be granted NFTs under applause. 2 Story Points = 1 NFT.
<b>Sanctions</b>	People who clearly violate rules multiple times should either write a poem, do extra work or obtain remaining User stories instead of free choice.
